Tailored Tape Solutions for  
Every Industry

ABOUT REWIND TAPE

# Welcome to Our World of Tape Excellence

Rewind Tape and Multipack, based in Chennai, India, excels in manufacturing top-tier BOPP packaging materials and a wide range of industrial tapes, including double-sided tissue, foam tapes, PVC insulation tape, and aluminum foil tape. With advanced machinery and a dedicated team, we ensure superior quality and innovative products.

Our state-of-the-art facility in Chennai reflects our commitment to customer satisfaction and industry-leading standards. We foster a positive work culture that promotes creativity and continuous improvement, dedicated to delivering excellence and supporting our customers' long-term success.

PREMIUM QUALITY, EXCEPTIONAL SOLUTIONS.

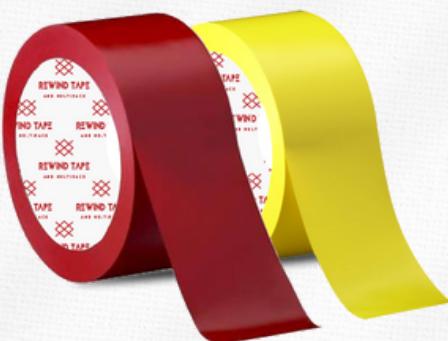

## Bopp Tapes (Brown & Transparent)

BOPP is Biaxially Oriented Polypropylene (BOPP) film coated with water-based adhesive.

- Available in brown and transparent colors.
- Ideal for carton box sealing and stationery purposes.
- Provides packaging and sealing solutions for both domestic and industrial needs.
- Features high-performance adhesive for secure sealing.
- Essential for industries requiring secure and efficient sealing of boxes.

## Bopp Tapes (Colour)

Coated with water-based adhesive and available in various thicknesses, Biaxially Oriented Polypropylene (BOPP) tape is essential for sealing medium-to-heavy-duty cartons. It is widely used in inventory management, shipping, and logistics.

- Designed for the demands of modern packaging and logistics, ensuring reliable performance in diverse applications.
- Widely used in colour-coding applications.

## Bopp Tapes (Printed)

We are a trusted manufacturer of printed BOPP tapes, catering to SMEs and major consumer brands. Our tapes feature - Biaxially Oriented Polypropylene Film coated with a water-based adhesive, ensuring superior quality and performance.

- Ideal for various applications including carton sealing, our tapes can be customized with company names or logos in multiple colours for enhanced appeal and easy identification.
- Also suitable for bundling, reinforcing, laminating, label protection, and tabbing purposes.

## Masking Tape

Masking tapes are versatile adhesive tapes used in painting, crafting, and DIY projects.

- They feature easy application and clean removal without residue, making them ideal for temporary fixing and protecting surfaces.
- With varying widths and adhesive strengths, masking tapes are essential tools for precise detailing and surface preparation in numerous applications.

## PVC Insulation / Electrical / Wire Harnessing Tape

- Extremely soft and flexible with high conformity, making them suitable for cable harnessing applications in the automotive industry.
- Available in Black, Red, Green, White, Yellow, Orange, Grey, Blue, Violet, and Sky Blue.
- Made from SPVC film with a rubber-based adhesive on one side.
- PVC Insulating Tapes are ideal for cable insulation and marking, meeting international safety standards and ROHS compliance.

## Foam Tapes

These tapes are essential for applications requiring strong adhesion, cushioning, and sealing properties, making them suitable for various industries where reliable bonding and protection are necessary.

- Versatile bonding capabilities
- Ideal for mounting and bonding applications
- Effective for gasketing and sealing
- Provides sound and vibration damping

## Self Adhesive Kraft Paper Tape

- Biodegradable self-adhesive Kraft paper tape is an eco-friendly alternative.
- Offers comparable strength to standard BOPP tapes with a 23-30 micron base film.

## Water Activated Kraft Paper Tape

Our water-activated reinforced Kraft paper tape is 90% fully recyclable and bio-compostable, featuring a biodegradable adhesive.

- It is designed for both light and heavy-duty packaging needs.
- This tape can be easily recycled along with the box, offering an environmentally friendly packaging solution.

## Self Adhesive Reinforcement Kraft Paper Tape

Our specially designed self-adhesive reinforced Kraft paper tape is ideal for carton sealing applications.

- It stands out as a biodegradable and eco-friendly tape, offering consistent quality performance.
- The tape is reinforced to impart high tensile strength, providing an extra margin of strength to your packages.

## Double Sided Tissue Tapes

Double-sided tissue tape is made of a thin tissue paper or non-woven fabric backing coated with adhesive on both sides. It provides reliable adhesion for various bonding needs in industries requiring secure yet flexible adhesive solutions.

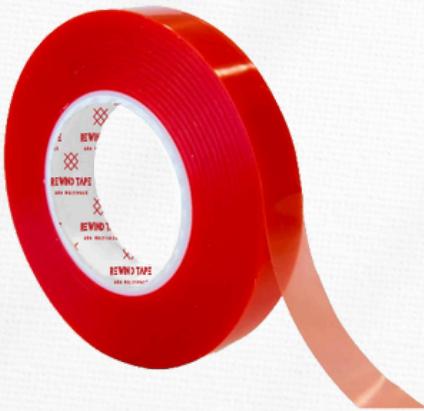

- Balanced adhesion on both sides
- Easy tearability for convenience
- Coated with acrylic water or solvent-based adhesives
- Ideal for mounting and bonding applications
- Commonly used in the shoe & leather industry and for crafts purposes

## Double Sided Cloth Tapes

Double-sided cloth tape is made from high-quality cloth coated with a strong modified adhesive tailored for the flexible packaging industry.

- Carpet fixing
- Plate mounting in flexographic printing units
- Reinforcing conveyor belts
- It is made from a cotton-based tape.
- It can be removed in one piece without tearing, leaving no residue behind.

## Double Sided Polyester Tape

It's a double-sided adhesive tape featuring a translucent salmon red color PE liner, ideal for mounting decorative profiles, moldings, and trim parts for wide-width lamination applications.

- High temperature resistant tape
- Solvent resistant
- Acrylic adhesive tape with strong holding power and no adhesive deterioration
- Excellent temperature and solvent resistance
- Preferred for flex media joints, foam board fixing, and joining glass and acrylic transparent sheets.

## Cross & Mono Filament Tapes

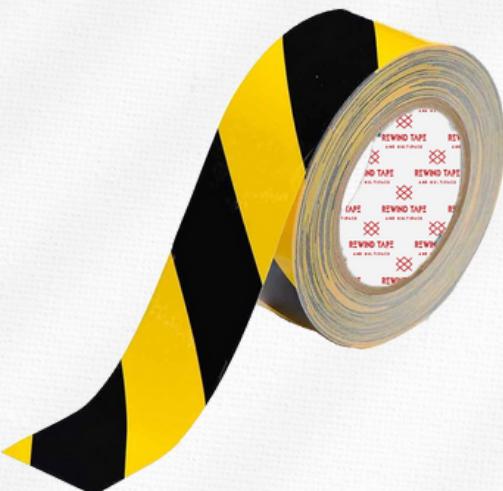

Our filament self-adhesive tape is specially designed for applications requiring high tensile strength. This tape features a film backing and rubber adhesive, reinforced with woven glass fibers to provide exceptional strength. It is particularly effective:

- For packing heavy-weight cartons.
- For palletizing applications.
- For strapping purposes.
- For sealing metal coils or bundling pipes.

## Floor Marking Tapes

Floor marking tape, made of PVC, is highly resistant to solvents, oil, and water. It features a durable carrier material coated with natural rubber adhesive. This tape is specifically designed for:

- Safety identification and lane marking in storage segmentation.
- Marking and distinguishing hazardous areas such as construction sites.
- Identifying obstacles like wiring lines, manholes, or other safety zones in exhibitions.

## Duct Tapes

Duct tape is a versatile adhesive tape renowned for its robust and durable characteristics. Typically featuring a cloth or plastic backing coated with a strong adhesive, it is commonly silver-gray in color.

- High strength for demanding applications
- Very high bonding adhesive for secure adhesion
- Hand tearable for easy application
- Waterproof properties for reliable use in various conditions
- Ideal for general repairs, construction, and building projects
- Used extensively in HVAC (Heating, Ventilation, and Air Conditioning) and ventilation systems.

## Aluminum Foil Tape & FSK Tape

Aluminum foil tape is a versatile adhesive tape with a thin layer of aluminum foil as its backing material. This tape's strong adhesive ensures firm adhesion to a variety of surfaces where durability and easy application are crucial.

- Residue-free removal
- Writable grade
- Hand-tearable
- Suitable for HVAC & duct works
- Used for pipe and duct insulation
- Reflective insulation applications

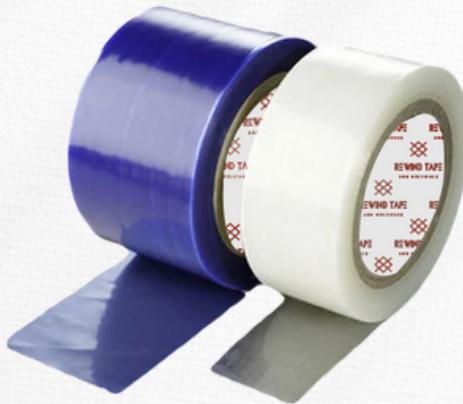

## HDPE Tapes

This superior quality self-adhesive tape is specially designed for joining and sealing bags with an HDPE base. It features high adhesion and tensile strength, ensuring secure and durable seals for:

- Heavy carton sealing
- Reinforcing applications
- Splicing
- Bundling
- Laminating
- Strapping
- FIBC industry products
- FIBC bag jointing

## Surface Protection Tapes

It is designed to safeguard surfaces from scratches, and marks during handling, transit, and after installation. These films ensure surfaces remain pristine throughout various stages, from manufacturing to installation, maintaining quality and appearance.

- Excellent scratch resistance and masking properties.
- Easy removal without leaving any residue.
- Suitable for high-speed lamination.
- Provides uniform and stable protection.
- Printable for labeling purposes.

## Shrink Film

This waterproof tape ensures added protection and boasts high tensile strength for robust performance. Its excellent flexibility makes it adaptable to various shapes and surfaces, providing a reliable seal.

- Ideal for packing bulk goods and bottles
- Suitable for packing eatables and household items

## Stretch Film

This tape provides excellent elasticity, ensuring flexibility and durability. It also boasts high tensile strength for robust performance, high clarity for clear visibility, and high tearing strength for added reliability and resistance to breakage.

- The highly recyclable film enhances product and package stability.
- Widely used in the food, electronics, and logistics sectors.
